# Getting Started with Flowdock

Flowdock is currently available only as Proof of Concept (PoC) offering from DevCloud and it is not yet production ready. At this time Flowdock is available by invite only to select teams.

How to Login to Flowdock using Rally

1. **NOTE: All GE employees and contractors must always login to Flowdock through Rally. If you have a Rally account, skip to step 2. If you do not have a Rally account, please quickly set one up:**
    a. Go to this URL: https://gesoftware.service-now.com/ Login if GE prompts you to sign in using your SSO and password. Successful login will direct you to our Service-Now instance. This step will prevent any issues moving forward. Go to https://portal.devcloud.sw.ge.com/
        i.

        ? Unknown Attachment
    b. Click the **Support** Tab
    c. Hover over the Rally logo and click "Request a New User Account"
    d. Submit and you will have access to https://rally1.rallydev.com/slm/login.op

2. You will receive a link to Flowdock in your work (Outlook) email.

    Click the green **Accept** button.

3. On the next screen, select

Returning Users - Log in to Flowdock

LOG IN USING RALLY

Forgot your password? · Create an account

NOTE: Do not log in using Google. Any accounts registered with a non-GE email will be deleted without warning.

Sign in to Rally

Are you a Rally customer? You can sign in with your Rally username and password.

USERNAME

julie.byrne@ge.com

PASSWORD

Sign in Cancel

Forgot your password?

---

4. Enter your Rally username which is the primary email address associated with your SSO ID. Leave the password field blank. The login page will redirect you to the GE SSO page if

    you are not logged in to SSO (just login as usual), or will automatically authenticate the user if already logged in to SSO.

    You will be logged into Flowdock as the username that matches your Rally username (i.e. the primary email address associated with your SSO ID).

Please contact **DevCloud Support** with questions or issues about setting up your GE Flowdock account.
