

## DVR and Following

~212 words	Title card / Branding
Hey there! Hopefully by now you're really diving into your Fios Experience. But how about customizing it? If you 'follow' your favorite shows and movies they'll be automatically recorded. Pretty neat, huh?	Show My Stuff.
It's sooo easy too...just press the heart button on your remote. C'mon - show it some love!	Show remote button.
<p>You'll see <b>this</b> on your screen.</p> <p>And if you decide to part ways...simply hit it again and confirm on <b>this screen to unfollow</b>. Guess <i>this</i> romance is DONE!</p> <p>Better still, following can even be set up to record shows that haven't been released yet...like that new season of Big Bang Theory that starts in a few weeks.</p> <p>If you change your mind, that's ok - press the heart button <i>again</i> you to modify your upcoming recordings.</p>	<p>Show notification.</p> <p>Show unfollow action.</p> <p>Show this action.</p> <p>Show modification options.</p>
Stuff you follow will also show up in...wait for it...your <b>My Stuff</b> area.	Show My Stuff.
From here you can watch, manage, delete, or restore your DVR content.	Show Manage Recordings screens.
And to help identify your followed content, you'll notice heart icons in your own profile color throughout your Fios TV.	Show heart icon in different places throughout the user experience
If you have the additional DVR service, there's a ton of on-board recording storage and flexibility. How about recording <b>up to 12 shows at once</b> ?! And storing <b>up to 500 hours of HD programming</b> ? And it goes where YOU go - you can access it from anywhere in your home or on any computer	<p>Show DVR</p> <p>Show person/persons stopping/watching</p>

or mobile device	same movie in 2+ places.
If you're so taken with the service that you've run out of space, no problem -- simply say "Upgrade my DVR" into your remote - or update your account settings. Yep, it really is that easy. Go on, give it a whirl.	Show voice control button Show flow to get to account settings
