Fluidmaster Fill Valve Flyer

<HEADLINE>

Same Price, Better Fill Valve. Upgrade to The Whisper Fill Valve with Leak Sentry Today!

<BULLETS>

Why?

One leaky toilet can waste enough water to fill 28 bathtubs per month.

Water waste is difficult to pinpoint in buildings that are not sub-metered — install the Whisper Fill Valve with Leak Sentry and save on water bills!

Exclusive Leak Sentry technology alerts tenants of a leak—forcing them to call maintenance.

Help guard against water damage and costly building repairs – save thousands of dollars per year!

Reduces noisy, damaging “water hammer.”

Prevents automatic refill of leaky toilet tanks.

5-Year Warranty

<BODY>

How Leak Sentry System works:

(pic 1) When a leak starts to drain the toilet tank, a unique “locking” action prevents the float cup from dropping.

(pic 2) This forces the user to press the tank lever twice. The first time unlocks the Leak Sentry System and refills the tank.

(pic 3) The second time initiates the flush. Even when the Leak Sentry System “locks” the valve before refill, the toilet remains fully operational.
