Renovations

Or...Renovation Services

From Facilities Maintenance website:

We're Your Total Renovations Solution

HD Supply Facilities Maintenance provides a complete solution for your renovation projects. Choose us to be your facility maintenance and renovation partner, and get the flexibility you need to handle your project no matter how big or small.

We'll help you manage your project every step of the way

A specially trained representative takes your call, listens to your renovation needs and helps identify solutions.

Your Renovation Coordinator will visit your work site* to evaluate your job and identify your unique needs.

Together we establish a plan to meet your goals and deadlines.

We simplify procurement by helping select the right products for your property.

You can rely on our expertise and access to thousands of quality products from HD Supply Facilities Maintenance.

You'll be able to review job quotes for your project, lead times and project-specific volume pricing.

You'll receive monthly summaries itemizing the products you've purchased to help you with project organization, inventory management and budget control.

Brochure Value Proposition (Beth's notes)

- Refacing your cabinets and drawers is a simple, hassle-free way to update your kitchen
- The result is a bright, refreshed, affordable and custom- looking kitchen completed in a fraction of the time
- Brand new custom cabinetry can be costly and with time consuming labor
- Refacing your cabinets and drawers allow you to keep perfectly sound cabinet structures
- Choose from a large selection of door styles and finishes

Page 3

Brochure How to Measure (Positioned above the Kitchen-at-a-Glance chart.)

HD Supply has a great selection of cabinet styles and finishes for you to choose from. Follow three easy steps and you'll be on your way to enjoying the benefits of a newly remodeled kitchen today!

- 1) Measure each wall in the kitchen (once near the floor and once near the ceiling) Use the smaller of the two measurements.
- 2) Measure existing wall cabinets' width and height for replacement sizes (wall cabinets are a standard 12" deep).

3) Measure existing base cabinet' width (base cabinets are a standard 33-1/2 height and 24" deep).

- Check your work: Combine the base cabinets and appliance widths. The total cannot exceed your wall measurement. Preferably, the total will be 2" less than the wall measurement.
- Filler is used to complete your cabinet layout and is available in standard 3" widths. It can be scribed to fit any remaining space up to 3" wide.
- A complete list of available cabinets is provided on the Kitchen-at-a-Glance chart below.

Timberlake-Oak

Catalog Vendor Attributes and At-A-Glance Chart (page?)
(Positioned above the Kitchen-at-a-Glance chart.)

Timberlake (about the vendor)

- Preassembled
- Standard Overlay
- Side Mount Drawer Glide System
- 18" Deep Drawers
- 1/2" thick, engineered wood cabinet sides
- Hardware Required

Fairfield

- Natural Oak and Honey Oak Finishes
- Recessed Veneer Panel

Cascade

- Honey Maple and Maple Spice Finishes
- Recessed Veneer Panel

Andover White

- White Thermofoil (pages 6-7??)
- Raised Veneer Panel

From Timberlake website:

A perennial favorite, Oak is appreciated for its rich graining and cozy, home-spun feeling.

Oak is an open-grained hardwood with varying patterns ranging from straight grain to wide arcs. When stained, there will be a noticeable difference in the color shades between the open and closed grain areas of the wood. Wood cut from the heartwood will range from pink to a reddish brown. Because of the distinct character of the grain patterns, oak is one of the most popular wood species used for cabinetry.

Page 6 (TWO PAGE SPREAD)

Timberlake-Thermofoil

From Timberlake website:

A high-tech process results in a tough surface that looks like painted wood.

White Thermo Foil is a process whereby a thick vinyl film is bonded permanently to a warp-resistant engineered wood core. Because the color is throughout the film, the surface is durable, easy to clean and especially resistant to chipping and cracking.

Fabrication Program

About the Program

Many of your supply's can be ordered directly from our catalog, but certain items must be made to order. Our new fabrication centers now offer you a broad selection of customized products to help you get the job done right.

Door and Drawer Replacement

Make a kitchen look brand new with customized beveled door and drawer fabrication. Match you existing cabinet door and drawer with one of 11 colors, including paint grade MDF

Door and Drawer fronts are available in the 11 colors with matching backs:

- Paint Grade (Non-bevel option)
- Natural Oak
- Hard Rock Maple
- White
- Golden Oak
- Nepal Teak
- Carolina Oak
- Almond
- Victorian Oak
- English
- Gunstock (Dark) Walnut

Take Measurements.

How to Measure:

- Measure the door from left to right (width) and from the top to bottom (height).
- If no existing doors: Measure opening and add 1" to width and 1" to height.
- Measure to the nearest 1/8" inch on all door & drawer front orders.

Drawer Boxes

In addition to your customized drawer fronts, our fabrication centers can now construct accompanying drawer boxes.

Our solid wood ply door boxes come fully assembled (drawer glides and hardware not included) to your specifications and are shipped direct to you from our fabrication center. Our experts provide you with sturdy, quality customized door boxes

How to Measure:

- Measure exact outside width of drawer. Figure must be exact.
- Select depth and width from list. Round down if needed.

Available Depths: 15-3/4", 17-3/4", 19-11/16", 21-5/8"

Available Heights: 3-3/8", 4", 5-1/8", 5-7/8", 8"

Page 15

Special Order Program

Improve resident retention by investing in your kitchen.

We offer a wide range of replacement door and drawer fronts to refresh the look of your kitchen, it's fast, easy and cost efficient.

Choose from three different Material Options:

Wood Styles:

Featuring the warmth of real wood and quality craftsmanship, the clean lines of these doors will give a distinct look to any kitchen. Solid wood door and drawer fronts complete and compliment the look

Rigid Thermal Foil (RTF):

RTF door and drawer fronts are the result of a process whereby a thick vinyl film is bonded permanently to a warp-resistant wood core. RTF offers the look of painted wood but with the toughness and durability paint can't provide.

Melamine:

Door and drawer fronts are constructed using a 5/8" high grade particle board core with a thermalfused melamine laminated to front and back. The laminated surface resists wear and staining while providing easy maintenance in high traffic areas.

Decore-Active Specialties (insert logo)

Celebrating 40 years of serving cabinet makers nationwide, Decore-Active Specialties is recognized as a leading door manufacture in the cabinet industry.

Experts at crafting over 250 door styles, custom-sized, in any available unfinished wood species, RTF, laminate and veneer, as well as almost any custom door design imaginable.

Quality Doors: (insert logo)

For more than 30 years, Quality Doors has been crafting the finest cabinet doors and drawer fronts available. From commercial applications to residential do-it-yourself installations, Quality Doors offer an extensive line of products that are as affordable and durable as they are beautiful.
